PROFESSIONAL SUMMARY

Business-minded Data Analyst / Business Analyst with hands-on experience translating raw data into stakeholder-ready insights that support operational and financial decisions. Proficient in SQL, Python, Tableau, Power BI, and Excel, with a strong track record of building end-to-end analytics solutions including requirements gathering, data transformation, dashboard development, and executive reporting. Trained in Business Analytics and International Business, bringing a balanced perspective of technical rigor and commercial impact to every analysis.

SKILLS

Analytics & BI: SQL (Joins, CTEs, Window Functions), Tableau, Power BI, Excel (Pivot Tables, VLOOKUP, What-If Analysis)

Programming: Python (pandas, NumPy, scikit-learn, matplotlib, seaborn, Plotly), R, Jupyter Notebooks

Techniques: EDA, Data Cleaning & Validation, ETL Pipelines, Regression, Clustering, Forecasting, A/B Testing Concepts

Business & BA Skills: Requirements Gathering, Stakeholder Communication, KPI Development, Data Storytelling, Process Improvement, UAT Support

PROJECTS

Revenue & Operations Analytics — Restaurant Performance Study

Defined business questions, analyzed 100+ orders over 3 months using SQL, and built an executive Tableau dashboard with 6 KPIs. Identified a menu category driving 42% of revenue (\$4,657+), revealed staff performance gaps, and supported data-backed recommendations for pricing, incentives, and operational efficiency.

Personal Finance Decision Engine — Full-Stack Analytics Dashboard

Built an interactive financial analytics tool tracking 1,200+ transactions and savings goals. Identified overspending patterns exceeding budgets by 22% and delivered actionable insights via custom visualizations and persistent client-side data architecture.

Budgeting & Savings Trend Analysis — Tableau Financial Dashboard

Cleaned and modeled 200+ transactions, developed dashboards for income vs. expenses and savings trends, and uncovered spending concentrations accounting for 61% of non-essential expenses, improving projected savings by 15%.

EDUCATION

Postgraduate Diploma in Business Analytics — Seneca College, Toronto, ON

Postgraduate Diploma in International Business Management — Seneca College, Toronto, ON

CERTIFICATIONS

Google Data Analytics Professional Certificate | Excel Essential Training (Microsoft 365)

LEADERSHIP & CONTRIBUTIONS

Mentored peers in SQL and Tableau during capstone projects. Active contributor to open-source analytics projects and data community discussions.
